Inclusive Process

This sample format can be used while you are organizing your Continuum of Care planning process. It will help ensure that you have documented the process that your community has gone through to reach out to all categories of potential participants during the planning process.

For example:

Date	Category of Participants	Key Actions to Involve
May 26, 1999	Mental Health Providers	• Contact city or county mental health providers • Identify key players • Invite key players to participate in the Continuum of Care planning process
